RETROFIT COMPRESSED AIR INCENTIVE WORKSHEET

Air Compressor Incentive Calculation

ltem	Compressor Horsepower (A)	Compressor CFM	Annual Hours of Operation	Compressor Control Code ¹	Additional Storage (Yes or No)	Incentive (\$) per HP ² (B)	Air Compressor Incentive (\$) (A X B)
Ex.	25	110	2,950	VSD	Y	\$200	25 X \$200 = \$5,000
1							

Note: Vendor quote or proposal required for Incentive.

Additional Primary Storage Incentive Calculation- see Table 1 (only applicable if storage code above = "Y")

ltem	*Minimum Storage Required (gallons) (A)	Maximum Storage Eligible (gallons) (B)	Existing Storage (gallons) (C)	Minimum New Storage Required (gallons) (D) = A - C	Maximum New Storage Eligible (gallons) (E) = B - C	**Storage to be installed (gallons) (F)	Storage Incentive F x \$2.75 (not to exceed E)
Ex.	220	330	100	120	230	275	230 x \$2.75 = \$633
1		_					

^{*}System must meet Minimum Storage (A) to be eligible for Compressor Incentive

Total Incentive	

¹ Compressor Control Codes & Storage Requirements

Compressor Type	Control Code	# Minimum Gallons per CFM	## Maximum Gallons per CFM
Variable Speed Drive	VSD	2	3

² High Efficiency Air Compressor Incentive per HP

Incentive Per Horsepower	15 to 24	25 to 49	50 to 75
VSD	\$170	\$200	\$180

This is the maximum gallons eligible for incentives.

Installed capacity may be larger.

Notes

- 1. These Prescriptive Incentives apply to single, oil flooded compressed air systems only. Multiple and /or oil free air compressor systems may be eligible for a Custom Incentive but must pass a benefit-cost test.
- These Prescriptive Incentives apply to air compressors with nameplate ratings ≥ 15 HP and ≤ 75 HP. Air compressors > 75 HP may be eligible for a Custom Incentive. Air compressors rated in kW shall be converted to HP as follows: kW / 0.746 = HP
- 3. The rated HP of the replacement air compressor shall not exceed the existing air compressor rated HP by more than 10%. Existing compressors replaced with a new, larger compressor (> 10%+/-) will be reviewed under the New Equipment & Construction Program
- 4. These Prescriptive Incentives apply to variable speed control (VSD) compressors.
- 5. These Prescriptive Incentives apply to air compressors with an operating pressure of 145 psi or below. Compressors with higher operating pressures may be eligible for a Custom Incentive.
- 6. Minimum air storage requirements as specified in the Compressed Air Incentive form must be met and may include existing air storage to meet the requirement.
- 7. Air compressor must operate a minimum of 2,000 hours a year.
- 8. Air compressors with VSDs must have as a minimum a 3% impedance series reactor in its AC power input connection.

Form RCAR17 1/17

^{**}Storage capacity over Maximum Storage (E) is not eligible for Storage Incentive

[#] Minimum Gallons per CFM recommended by the Compressed Air Challenge
