

Spring into savings by weatherizing your home.

Weatherization is the process of making your home better protected against the effects of changing weather and can include:

- Sealing air leaks
- Adding insulation
- Sealing ductwork

As a result, you'll notice:

- Heating and cooling systems work less to keep your home at the desired temperature
- You're more comfortable thanks to less drafts
- A cleaner home as allergens, like dust and pollen, are kept out
- Reduced energy bills during the heating and cooling seasons

Leave weatherization to the professionals. We can help you with Home Energy SolutionsSM. Home Energy Solutions is available to eligible customers and includes air sealing and duct sealing, if applicable. If insulation is recommended, a rebate is available.

Income-eligible customers receive the initial visit at no-cost and may receive additional services at little to no cost.

Visit eversource-ct.com/HES to get started.

Recycle your inefficient refrigerator and save

An inefficient refrigerator or freezer may cost you up to \$125 per year to run. Recycle that appliance responsibly at no-cost through Eversource. You'll reduce your energy use and receive a \$30 rebate.

A \$30 rebate is available to Eversource electric customers that recycle their qualifying, still working refrigerator or freezer.

Up to 95% of your appliance will be recycled and turned into new, useful products, like cell phones or even bridges.

Call 888-997-8892 or visit eversource.com/appliance-recycling to learn how to schedule your pick-up today.
