

In the heat of the summer

you may not be thinking of

your heat in the winter.

But now is the best time to consider switching to natural gas heat.

If your current heating system is ready to be replaced, consider replacing it while it's still warm outside—with an efficient, environmentally friendly, gas heating system. And if you switch to gas heat, you'll be eligible for a lower gas rate, so be sure to call us when you install your new gas equipment.

You already have a gas line coming into your home.

We'll verify that your gas service line and meter have sufficient capacity. We can even connect you with Value Price Program (VPP) contractors who can replace your heating system for an affordable price.

Natural gas is clearly a good value, and you can save money now with a **\$250 gas bill credit** (Expires on 9/30/2021*), **Incentives** on qualifying high-efficiency equipment,** and **Financing as low as 0.99%** on qualifying high-efficiency equipment purchases.***

Call us today at 1-855-OIL2GAS (1-855-645-2427)

Monday through Friday, from 8 a.m. to 5 p.m.

Mention Code: *BILL INSERT*

* Customer must convert to natural gas heating by 9/30/2021. Credit is issued when the customer starts using natural gas for heating.

** Ends 12/31/2021. See EnergizeCT.com for equipment eligibility. Natural gas instant equipment discounts are available for ENERGY STAR® certified heating systems based on equipment efficiency.

*** Ends 12/31/2021. Financing eligibility and terms and conditions vary by lender.
