## Spring into Energy Savings

As the warmer weather and longer days greet us, it's the perfect time to adopt energy-saving practices for a cost-effective and sustainable spring.

- Participate in Home Energy Solutions<sup>SM</sup> and you may qualify for no-cost air sealing, 75 percent off insulation, heat pump rebates, and 0% financing
- Combat phantom energy drain by unplugging electronics when not in use, or invest in an advanced power strip to easily cut power to multiple devices
- Schedule an HVAC tune-up to ensure optimal system performance, and clean or replace air filters regularly to maintain optimal airflow
