

Resolve to save in 2021

Improve your home's comfort and save money and energy with weatherization. You can receive year-round benefits — a warmer home in the winter; a quieter home with less outdoor allergens in the spring and fall; and a cooler home in the summer.

Home Energy SolutionsSM can help you get started. By participating, you receive a home energy performance assessment, on-the-spot improvements such as air sealing, and energy efficient products, all at no cost. During your visit, an authorized Eversource contractor will also provide custom recommendations and discounts for energy-saving improvements, such as up to 100% off the cost of eligible insulation projects, so you can stay warm while you're staying in.

The no-cost visit and enhanced incentives are only available for a limited time. Sign up now to fulfill your resolution to save in 2021.

**To request an appointment and for more details,

Winter tips to help you save

Eversource is here to help with simple ways to lower your energy costs this winter.

- Dry two or more loads of laundry in a row to take advantage of extra heat in the dryer.
- Plug electronics into advanced power strips. They save energy by sensing when your electronic devices are idle, automatically preventing them from using power.
- Skip the tub and take a shower. It takes 35 to 50 gallons of water to fill a bathtub versus 25 gallons used during a 10-minute shower.
- When it's time for a new television or computer, consider purchasing an energy-efficient product. ENERGY STAR® certified products typically use about 50% less electricity than standard products.
- Sign up for Home Energy SolutionsSM for customized support. An authorized contractor will evaluate your home and provide energy-saving recommendations, no-cost products as well as on-the-spot improvements.

For more tips, go to the [Save Money & Energy](#) section of [Eversource.com](#).
