

Summer 2021 Rate Adjustments

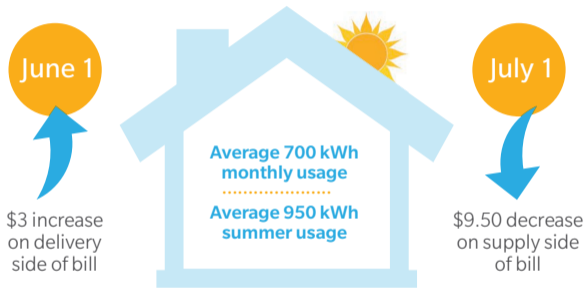

On June 1, a delivery rate adjustment took effect. A customer using an average of 700 kWh per month saw a bill **increase of less than \$3**.

This rate change covers costs associated with building and maintaining a reliable electric system. It does not include costs associated with restoring power following Tropical Storm Isaias.

On July 1, customers who receive energy supply from Eversource (vs. a third party) saw a **decrease of over \$9.50** for an average customer using 700 kWh per month.

For more information on rate adjustments or how your bill is calculated go to [Eversource.com/understand-my-bill](https://www.eversource.com/understand-my-bill).

Paid for by Eversource customers.

Did you know that customers use approximately **30% more energy** in the hot summer months?

Are There Programs to Help Me Pay My Bill?

If you're having trouble paying your energy bill or rent, help is available. Eversource is partnering with UniteCT to provide eligible Connecticut renters up to \$1,500 of past due electric expenses, as well as past or future rent expenses.

More information is available at Eversource.com/billhelp.
