

Lower energy use, increased comfort

Weatherization is the process of making your home better protected against the effects of changing weather and can include:

- Sealing air leaks
- Adding insulation
- Sealing ductwork

As a result, you'll notice:

- Heating and cooling systems work less to keep your home at the desired temperature
- You're more comfortable thanks to less drafts
- A cleaner home as allergens, like dust and pollen, are kept out
- Reduced energy use during the heating and cooling seasons

We can help you with Home Energy SolutionsSM

Home Energy Solutions is available to eligible customers for a \$50 fee and includes air sealing and duct sealing, if applicable. If insulation is recommended, a rebate is available for \$1.70 per square foot of insulation installed, up to 75% off the total project cost.

Income-eligible customers receive the initial visit at no-cost and may receive additional services at reduced cost, including up to 100% off recommended insulation.
