

## Now's the Time to Upgrade Your Natural Gas Water Heater

ENERGY STAR® certified natural gas tankless on-demand water heaters are energy-efficient, provide reliable hot water, optimize energy consumption, and offer cost savings over traditional natural gas units.

Enjoy a \$300 instant discount when your plumber purchases an eligible model from a participating distributor.

Installations must be completed by December 31, 2024, to qualify for rebates.

## Is Your Natural Gas Heating System Ready for Winter?

ENERGY STAR® certified natural gas boilers and furnaces are up to 97 percent efficient, keeping your family warm while using less energy than other natural gas models.

You can enjoy rebates of \$750 when replacing an inefficient non-condensing boiler with a new, high-efficiency condensing boiler, or a \$650 rebate when replacing an inefficient non-condensing furnace with a new, high-efficiency condensing furnace.

Take advantage of natural gas incentives before they end at the close of this year. Make sure your installation is completed by December 31, 2024, to qualify for rebates. Existing equipment verification is required.
