

Lower Energy Use and Increase Comfort Through Weatherization

Properly weatherizing your home can lower your heating and cooling costs by up to 20 percent, reduce allergens, provide health benefits* and more.

Complete your Home Energy SolutionsSM assessment by June 30, 2025, and receive insulation recommendations at up to 75% off, along with services and products valued at an average of \$950—all at no cost.

An Energy-Efficient Journey Inspires Campus-Wide Change

Jeff D. of Loomis Chaffee, an independent school in Windsor, improved his home's efficiency through the Home Energy Solutions program. After upgrades such as insulation, new windows and energy-efficient appliances, he achieved a 10 percent reduction in energy use and increased comfort. Inspired by his experience, Jeff encouraged the school to participate. As a result, nearly all faculty housing was upgraded with insulation, air sealing and heat pumps, and two energy-efficient homes were built on campus, further advancing the school's commitment to sustainability.

*"Our faculty, staff, students and parents notice a difference, and the community continually asks how they can make changes in their homes. **We are grateful to Energy Efficiencies Solutions and Eversource for their partnership,** guidance and for implementing these energy-saving programs."*

- Jeff D., Sustainability Coordinator for Loomis Chaffee
