

Energy efficiency tips for summer

Summer is here and Eversource is committed to providing solutions that help lower energy use and improve comfort. Implement any of the below tips to start reaping the benefits:

- Close your blinds in the daytime. Southern- and western-facing walls take the brunt of the sun's heat, so invest in good drapes or shades for the windows on these walls and keep them closed
- Make sure your home has been properly weatherized to keep cool air in and warm air out
- Plant some trees. Shade landscaping positions trees and other vegetation so their shade falls on the house and provides protection from direct sunlight. If you're planting near power lines, visit eversource.com/vegetation for planting guidance

EVERSOURCE

Proud Sponsor of

Enjoy lower energy use and reliable hot water with high efficiency equipment.

Keep energy use down and hot water flowing this summer with an energy-saving water heater.

When it comes time to replace your natural gas water heater, speak to a licensed contractor to see if an ENERGY STAR® certified tankless water heater is suitable for your home.

An instant discount of \$300 is available when your contractor purchases eligible high efficiency equipment on your behalf.

Visit eversource.com/home-savings or speak with your contractor to learn more
