

## Efficiency that warms your water and your wallet

As the winter chill sets in, ensure hot water and savings with ENERGY STAR® certified natural gas water heaters, designed to save energy and keep you cozy.

ENERGY STAR certified natural gas water heaters are energy-efficient, provide reliable hot water while optimizing energy consumption, and result in cost savings compared to traditional models.

Eversource customers are eligible for a \$300 instant discount on ENERGY STAR certified natural gas water heaters when your plumber purchases an eligible model from a participating distributor.

## Stay warm and save energy this winter with ENERGY STAR® certified natural gas heating equipment

As winter's grip strengthens, invite the dual comforts of warmth and savings into your home with an energy-efficient natural gas boiler or furnace.

Opting for ENERGY STAR certified natural gas heating equipment ensures reliable warmth, unlocks energy savings, and offers environmental advantages.

As an added benefit, Eversource customers can enjoy rebates of \$750 when replacing an inefficient non-condensing boiler with a new, high efficiency condensing boiler, or a \$650 rebate when replacing an inefficient non-condensing furnace with a new, high efficiency condensing furnace.

To qualify, customers must complete a verification inspection on their existing heating system.
