

# Energy Savings for Business Customers

Eversource is dedicated to helping your business save money and energy. You can get started today with a no-cost assessment of your building's energy use, which provides you with a plan outlining all the energy-saving measures you are eligible for, and a breakdown of estimated energy savings.

We also offer rebates and discounts on energy-saving equipment, assistance with new construction or major renovations, energy saving tips and strategies for your business, a demand response program, and more.

Visit us today at

# Renewable Energy Credits

Interested in installing renewable energy at your business or non-profit? Non-residential electric customers in Connecticut who install new renewable energy projects, ranging from rooftop solar panels to fuel cells, can receive long-term payments from Eversource under the Small ZREC program.

If your project qualifies, Eversource will buy Renewable Energy Credits produced by your clean energy system under a fixed-price, 15-year contract. Information on applying to the Small ZREC program is available on our website at [Eversource.com](https://www.eversource.com), Save Money & Energy, Renewable Energy Credits, Small ZRECS.

*Beginning in November, Eversource will be offering a new Rate option for new and existing business customers currently on Rate 27 & 30. The new Rates, 27A and 30A, will reduce demand charges and add a charge for electricity based on kilowatt hours (kWh) used over a billing period. If you'd like more information on this new Rate, visit [Eversource.com](https://www.eversource.com) and select 'About Your Bill' under 'My Account.'*
