

About Your May Bill

EVERSOURCE

Eversource's No. 1 priority is providing safe, reliable energy. In keeping with that commitment, Eversource submitted proposed delivery rate adjustments to the Public Utilities Regulatory Authority (PURA) for review. As a result, a delivery rate increase will take effect with your May bill.

This increase is driven by two primary factors;

1 ***Costs that had been postponed in 2020 and in 2021 due to the economic strain on customers from COVID-19.***

2 ***And an increase in costs associated with maintaining the safety and reliability of our electric transmission and distribution systems.***

If approved by PURA, the average residential customer will see an approximate increase to their total bill of about \$7 or 4.5% effective May 1. The impact to your bill will depend on the rate you're on and your energy use.
