

Prepare for high winter gas bills

The cost of natural gas will be higher this winter than it has been in several years. The increase is being driven by increased global demand for gas and U.S. supply shortages. We are asking all customers to prepare for higher-than-normal gas bills this winter.

Act now before winter heating season

We can help you take steps now, before the heating season is in full swing, to lower your energy use and bill. Receive on-the-spot energy-saving improvements and recommendations with Home Energy SolutionsSM. You can start with a no-contact virtual visit, and we'll connect you with rebates and incentives to make larger improvements.

You can also take advantage of our Heating Cost Calculator at [Eversource.com/heating-calculator](https://www.eversource.com/heating-calculator), to see how colder weather impacts your bill and how small adjustments to your thermostat can help you save.

To learn more about these tools and rate changes taking effect this month, visit [Eversource.com](https://www.eversource.com).

Does Eversource offer programs to help?

We're here to help any customer with concerns about their bill. Even if you have never needed help before, you may now qualify for special programs to help lower your monthly bill, reduce your past due balance, or extended payment plans.

Learn more about these programs at [Eversource.com/billhelp](https://www.eversource.com/billhelp) or call us at 800-438-2278. We'll work with you one-on-one to find the right option for you.
