

## Save Big with Energy-Saving Home Heating Equipment

Take charge of your home heating bills this winter with an energy-saving heating system.

In most homes, heating is the single biggest energy expense, making it a great money- and energy-saving opportunity. Consider replacing your existing inefficient furnace or boiler with more efficient equipment.

You can save right away with an instant discount of up to \$750 on qualifying ENERGY STAR® models — so it's even easier to make the switch for energy savings today.

Talk to an HVAC contractor today to find the best, high efficiency model for your home.

## Go Tankless & Save on Water Heating

If your water heater is 10 years old or more, consider the energy savings of a natural gas-powered tankless water heater.

Talk to your plumber or HVAC contractor to find an energy-efficient model that's right for you and receive a \$300 instant discount on your purchase of a qualifying ENERGY STAR® certified water heater.

Enjoy hot water and savings you can count on: ENERGY STAR® certified natural gas tankless water heaters can trim your water heating costs up to 30% while also lasting much longer than conventional tank-type water heaters.
