

Prepare Your Home for Winter Comfort Through Weatherization

The crisp fall air is here and it's the ideal time to get your home ready for winter. Weatherizing now helps create a warm, cozy indoor environment and can **lower your heating and cooling costs by up to 20 percent.**

Other benefits include:

- Reduced drafts
- Improved air quality and humidity control
- Less outside noise and fewer allergens
- Lowered risk of ice dams

Through **a no-cost** Home Energy Assessment, you may receive recommendations for **approved insulation upgrades at 75-100 percent off and no-cost air sealing.** It is the ideal time to enhance your comfort and energy efficiency at home.

Fall into Savings: October is Energy Awareness Month

As the leaves turn and colder weather approaches, prioritize energy savings. Below are tips to help keep you cozy for less:

- **Harness the Autumn Sun:** Naturally warm your home by opening blinds and drapes on southern- and western-facing windows during the day to help reduce heating needs. Remember to close your blinds and drapes at night to keep the warmth inside and maintain a cozy atmosphere
- **Pre-Winter Prep:** Make sure your home is operating at its most efficient before the winter. Sign up for a Home Energy Assessment and receive up to 100 percent off approved upgrades like insulation. Plus, you could qualify for additional rebates on energy-efficient appliances and more
- **Skip the Bathtub:** It takes 35 to 50 gallons of water to fill a bathtub versus 25 gallons used during a ten-minute shower
