

DO YOU KNOW WHAT'S BELOW?

Do you see that **underground gas line** in the yard?

Did you notice that **buried electric cable**?

Do you see where your **water line** is coming into your house?

Find the words that will help you "Dig Safe!"

EVERSOURCE

DO YOU KNOW WHAT'S BELOW?

You don't know exactly where underground utility lines are when they are buried below ground. But damaging any of them can be dangerous, costly and inconvenient.

That's why it is so important to know what's below. Before digging in your yard to plant a tree or shrubs, install a mailbox, dig a fishpond — or any excavation project no matter how large or small — call 811 at least two business days before you start digging. A utility locator will come out to the area and mark the location of underground utilities so you can proceed with your work without risk of hitting a line, knocking out your utility service, and/or creating a dangerous scenario.

Eversource is proud to partner with 811 and other New England utilities promoting safe digging awareness and education.

Connecticut residents and excavators can reach out to **Call Before You Dig** at **800-922-4455**.

Massachusetts residents and excavators can contact **Dig Safe** at **888-344-7233**.

No matter what state you are in, you can always dial 811 – the national phone number.
