

Stay warm and cozy this winter with a heat pump

As winter approaches, consider a heat pump as an efficient way to keep your home comfortable.

Heat pumps are a clean, home heating solution available for homes with or without ductwork and can replace or supplement your current heating system.

Come summer, a heat pump will cool your home using less energy than a standard central or window air conditioner.

Enjoy the holidays in comfort with a heat pump and you may qualify for rebates up to \$15,000 for air and ground source heat pumps.

Visit eversource-ma.com/heat-pump for more details.

Cape Cod residents should visit capelightcompact.org

Prepare for winter now

This year, energy costs are expected to be higher than normal. You can minimize the impact on winter bills with energy efficiency improvements. Our energy-saving solutions can help.

- **Weatherization:** Insulate and seal your home to minimize drafts and maintain a comfortable temperature while using less energy. You may receive 75-100% off approved insulation improvements
- **Remove barriers:** Address weatherization barriers, like knob and tube wiring and vermiculite, with an up-front incentive
- **Heating:** If your heating equipment needs to be replaced, you may be eligible for generous rebates on the cost and installation of new equipment

See if you're eligible for increased incentives at MassSave.[applytosave.com](https://www.mass.gov/applytosave).
