

Prepare Your Home for a Cozy Winter

Weatherize your home to enjoy a comfortable, energy-efficient environment all winter long. With a no-cost Home Energy Assessment, you could receive recommendations for insulation upgrades at 75-100 percent off and benefit from no-cost air sealing.

Here's why weatherizing is a smart choice:

- Reduce drafts and lower energy costs
- Minimize the risk of ice damns
- Quiet outside noise and decrease allergens

Energy Savings for Winter

Increase your comfort at home and decrease your energy usage with these winter tips:

- Take advantage of natural light by opening window coverings during the day
- Keep your fireplace doors closed except when adding new firewood to prevent heated air from escaping
- Place draft stoppers at the base of your doors to deter warm air from leaving the room
- Ensure vents and radiators are not blocked by furniture to allow warm air to circulate freely
