

October is Energy Awareness Month and Eversource is here to connect you with solutions to help with winter energy costs.

- Use an advanced power strip to shut down all connected electronics at once and eliminate phantom load
- Ditch the screen saver. According to ENERGY STAR®, screen savers can burn more energy and prevent a computer from entering sleep mode
- Replace worn equipment with an ENERGY STAR certified computer that uses 25–40% less energy
- Streaming a show? Use a digital media player. Media players, such as ROKU or Apple TV, use a fraction of the energy that game consoles use
- Unplug cell phone chargers when charging is complete

Fully Charged Electric Vehicle Rebates

Whether you're considering buying your first EV or are ready to setup home charging, we can help.

Charging at home is one of the most popular advantages of electric vehicles, and we have rebates to help with the purchase and setup.

Eversource offers a \$500 rebate on qualified Level 2 Smart Chargers, and you can get another \$500 rebate to help with the costs of a home wiring upgrade to power your Level 2 Smart Charger.

You can also participate in managed charging and earn up to \$200 annually in rewards for charging when the electrical grid is less stressed. Connect your EV directly or enroll an eligible charger to participate.

Visit eversource.com/home-ev-charging to get started.
