

Prepare for high winter gas bills

The cost of natural gas will be higher this winter than it has been in several years. The increase is being driven by increased global demand for gas and U.S. supply shortages. We are asking all customers to prepare for higher-than-normal gas bills this winter.

Cape Cod residents should visit capelightcompact.org.

Act now before winter heating season

We can help you take steps now, before the heating season is in full swing, to lower your energy use and bill. Sign up for a no-cost, virtual home energy assessment for a personalized recommendations and energy saving products for your home, including a limited time offer for 75% or more off approved insulation improvements. Income-eligible customers may qualify for additional money and energy-saving offers.

You can also take advantage of our Heating Cost Calculator at Eversource.com/heating-calculator, to see how colder weather impacts your bill and how small adjustments to your thermostat can help you save.

To learn more about these tools and upcoming rate changes taking effect this month, visit Eversource.com.

Does Eversource offer programs to help?

We're here to help any customer with concerns about their bill. Even if you have never needed help before, you may now qualify for special programs to help lower your monthly bill, reduce your past due balance, or extended payment plans.

Learn more about these programs at [Eversource.com/billhelp](https://www.eversource.com/billhelp) or call us at 866-861-6225. We'll work with you one-on-one to find the right option for you.
