

Prepare Your Home for Winter Comfort Through Weatherization

The crisp fall air is here and it's the ideal time to get your home ready for winter. Weatherizing now helps create a warm, cozy indoor environment and can **lower your heating and cooling costs by up to 20 percent.**

Other benefits include:

- Reduced drafts
- Improved air quality and humidity control
- Less outside noise and fewer allergens
- Lowered risk of ice dams

Through a **no-cost** Home Energy Assessment, you may receive recommendations for **approved insulation upgrades at 75-100 percent off and no-cost air sealing.**

It is the ideal time to enhance your comfort and energy efficiency at home.

Fall into Savings: October is Energy Awareness Month

As the leaves turn and colder weather approaches, prioritize energy savings. Below are tips to help keep you cozy for less:

- **Harvest the Power of Advanced Power Strips:**
Advanced power strips cut power to multiple devices all at once, reducing "phantom loads", which helps to save on your energy usage
- **Screen Saver Alert:** Instead of using screen savers, set your computer to sleep or hibernate when not in use to save energy and extend your device's lifespan
- **Upgrade to ENERGY STAR® Certified Products:**
ENERGY STAR certified products use 25–40 percent less energy, helping to lower energy costs and reduce your environmental impact
