

Lower energy use, increased comfort

Weatherization is the process of making your home better protected against the effects of changing weather and can include:

- Sealing air leaks
- Adding insulation
- Sealing ductwork

As a result, you'll notice:

- Heating and cooling systems work less to keep your home at the desired temperature
- You're more comfortable thanks to less drafts
- A cleaner home as allergens, like dust and pollen, are kept out
- Reduced energy use during the heating and cooling seasons

Incentives to help you weatherize

To help you weatherize your home and keep your family comfortable for less, Eversource offers incentives.

Receive up to 75% off the cost of an eligible insulation upgrade plus air sealing at no cost. Depending on your income, you may qualify for additional incentives such as a no-cost insulation upgrade, increased rebates on efficient heating equipment, and appliance replacements.
