

## Is your inefficient refrigerator running?

Reduce your energy use and “catch” a rebate when you recycle a qualifying, still working refrigerator or freezer.

An inefficient refrigerator or freezer may cost you between \$100-\$125 per year to run. Recycle that appliance responsibly at no-cost through Eversource.

Up to 95% of your appliance will be recycled and turned into new, useful products, like cell phones or even bridges.

**Call 877-889-4761 or visit  
eversource.com/appliance-  
recycling to learn more and schedule  
your pick-up today.**
