

Experience Energy-Efficient, High-Performance Living

Build more than a house and create your own renewable energy future by electrifying your living space, and prioritizing energy efficiency, comfort, and indoor air quality. Minimize maintenance and energy use and reduce your environmental impact with a sustainable and efficient home for the future.

Eversource offers customers incentives and expert guidance for builders, developers, and homeowners when building energy-efficient new construction.

Explore the possibilities at eversource.com/new-construction or connect with your builder to transform your vision into reality.

Frostproof February: 75-100% Off Approved Insulation Upgrades

Increase comfort and reduce energy costs with 75-100 percent off approved insulation upgrades and no-cost air sealing. The benefits of a properly insulated and sealed home include:

- Lower risk of ice dams and potential roof damage
- Reduced energy use and fewer drafts
- Improved air quality and humidity control
- Reduced outside noise, allergens, and pests

Customers who meet specific household income guidelines may be eligible for additional savings.
