

Looking for a way to cool your home without adding ductwork?

Ductless Cooling

Ductless mini-splits are an efficient option that can cut cooling costs by 30%, when compared to a traditional room air conditioner.

Ductless mini-splits are commonly used in older homes or additions that may not have ductwork. Many units have features such as an app for your smartphone, so you can control cooling from anywhere.

Eversource can help you save money and energy with **rebates up to \$350** on systems used for cooling only.

Meter Readings

Your meter is scheduled to be read each month. This statement shows present and previous meter readings. The difference between readings determines the kilowatt-hours (kWh) used in calculating your bill. When a meter constant appears, the difference in the meter readings is multiplied by that number to obtain the total kilowatt-hours used.

Estimated Bills

An estimated bill is rendered when Eversource is unable to read your meter. When an actual reading is obtained, billing will be adjusted (if necessary) to reflect actual usage.

Check Processing

By sending your check, you authorize Eversource to use the check information to create an electronic funds transfer. The electronic transfer, for the original check amount, will be processed on the day your check is received. The check will be destroyed and an image of your check will be stored for two years. If the electronic transfer cannot be completed, a demand draft of your check can be created and used in place of the original.

Medical Emergency

If you believe a medical emergency exists in your home or would result if your service were to be disconnected, you may be protected from disconnection. Please contact us at 1-800-662-7764 for more information.
