EVERSOURCE

We're Committed to Providing You a Clean Energy Future

Eversource is taking the lead to power the possibilities for a clean energy future — one that will increasingly rely on renewable resources like wind, water and the sun to produce the electricity we all depend on.

We are supporting development of a combination of large-scale and small-scale renewable generating resources that will not only improve air and water quality for future generations but will also significantly lower energy costs. For example, Eversource's new solar generation facility in Springfield, Massachusetts, occupies 22 acres of land on top of a capped landfill, contains 12,980 solar panels and can supply electricity to 850 average-size homes.

Eversource also continues to invest heavily in equipment and automation to improve your service reliability today while supporting the integration of more renewable resources — as well as emerging clean energy technologies like battery storage and electric vehicle charging stations.

For homes, businesses and municipalities, Eversource offers our award-winning energy efficiency solutions that are delivering economic savings to our customers while reducing greenhouse gas emissions month after month.

Learn more about our commitment to a clean energy future in the About section at [Eversource.com](https://www.eversource.com).

Ready for Severe Weather

To make sure we're there when you need us, Eversource works hard year-round

to build a stronger and more reliable electric distribution system. We use the latest technology to reduce the length of outages while constantly improving how we get important information to you during severe weather.

To help keep you and your family safe when bad weather strikes, the Outages section of [Eversource.com](https://www.eversource.com) has storm preparedness information with tips for before, during and after the storm.

We're also always working to serve you better if the power does go out. You can sign up to receive outage alerts by phone, text or email. Our online outage map shows information about outages across our service territory and you can report your outage by using the Eversource app for Apple and Android devices.

A Great Night for Eversource Walk & 5K Run for Easterseals

For the fourth year in a row, Eversource partnered with Easterseals by serving as lead sponsor of the **Eversource Easterseals Walk & 5K Run on June 6 in downtown Manchester.**

Celebrating its 20th anniversary, Easterseals' signature fundraising event drew more than 2,300 runners and walkers, including 1,400 Eversource employees and their families.

More than \$230,000 was raised to help empower Easterseals' multi-generational programs that serve many New Hampshire citizens who are in need.

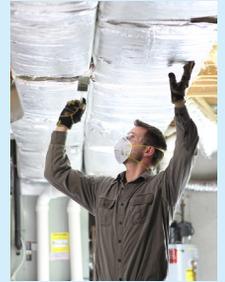

At Veterans Park before the race, Eversource Chairman, President, and CEO Jim Judge emphasized the company's commitment to community volunteerism: "We believe, as many of you do, that the power behind engaged and thriving communities is in the people who work tirelessly every day to make life better for those in need — and that's why we're all here today."

Visit the Community section at [Eversource.com](https://www.eversource.com) to learn more about our efforts to help build healthier, stronger communities.

Be Ready for Fall

Summer is winding down, so there's never been a better time to prepare your home for the coming cold. Home weatherization is a great way to keep your energy costs low and your home comfortable.

Taking weatherization steps like sealing drafts or installing additional insulation today can set you up to save money and energy all winter long. Plus, weatherizing your home can help you in the warm-weather months as well, by reducing allergen buildup, lowering cooling costs and more.

Visit the Save Money and Energy section of [Eversource.com](https://www.eversource.com) to find rebates, incentives, home weatherization programs and more.

GET THE EVERSOURCE APP!

Managing your account from a smartphone is easier than ever with the free Eversource app.
