

Important Information About Your Rates

Eversource adjusts the Energy Service Charge portion of your bill each February 1 and August 1. This is the portion of the bill that reflects costs for energy we purchase on behalf of our customers.

Beginning August 1, you will see this rate transition from 8.306 cents per kilowatt hour to 7.068 cents per kilowatt hours. The Energy Service Charge applies only to customers who purchase their energy from Eversource and not from a competitive supplier. Other rates are due to change on August 1 subject to the approval of the New Hampshire Public Utilities Commission, and these rates will be reflected in your August bill.
