

COVID-19 Consolidated Safety Plan

The following applies to Eversource employees as well as contractors and subcontractors working for Eversource, including those individual employees or contractors who are fully vaccinated for COVID-19. "Fully vaccinated" means ≥ 2 weeks after receiving the second dose in a 2-dose series (Pfizer-BioNTech or Moderna), or ≥ 2 weeks after receiving a single-dose vaccine (Johnson & Johnson [J&J]/Janssen).

Failure to follow company COVID-19 requirements will be treated as a violation of the Eversource Code of Business Conduct.

Contractors and subcontractors are responsible for providing all vehicles, tools, equipment, cleaning materials, and personal protective equipment (PPE), etc. required to comply with these safeguards.

Health Protection

- Self-Certification – by coming into work (i.e. onsite, in the field, or in a customer location, etc.) all persons are self-certifying they are not COVID-19 suspected, COVID-19 confirmed, COVID-19 quarantined, or sick with another contagious infection.
 - For Eversource employees, notify your supervisor if you cannot come into work. If COVID-19 suspected, confirmed, or quarantined, HRConnect (800-841-8684) must also be notified.
 - For Contractors and subcontractors, notify your Eversource Representative of any persons who, within the last 10 days, were on an Eversource worksite and are COVID-19 suspected, confirmed, or quarantined. The Eversource Representative must notify HRConnect (800-841-8684).

Administrative Safeguards

- Proof of vaccination, per [Eversource Vaccination Validation Requirements](#), is required to be documented with HR. Anyone who does not provide proof of vaccination shall be considered unvaccinated.
 - Visitors and Contractors will not be required to show proof of vaccination but will be required to wear a face covering when indoors.
- Unvaccinated should, where possible, maintain 6ft. social distancing.
- If you are traveling for business purposes, you must be aware of and comply with applicable COVID requirements.
- Eversource locker room, shower, and ready room facilities can be used.
- Indoor meetings shall be limited to no more than 20 persons. In cases where larger groups may need to gather, ECT approval will be required.
- Visitors to an Eversource location must follow any posted guidance.
- Facilities will maintain any COVID postings at entry points and other common locations.
- Water fountains at Eversource locations will remain disabled and water bottle filling stations at Eversource locations have been installed to replace the water fountains.
- Onsite cafeterias or catered food service shall be grab and go prepackaged meals only. No buffet services.
- Each person is responsible for cleaning up after yourself in common use areas and maintaining a clean workstation.
- In buildings where we have Electric and Gas System Control/Dispatch/LNG Centers, the rooms must be clearly labelled, will continue to use temperature screening kiosk systems, and will be entered only by authorized personnel.

PPE Safeguards

- When not wearing a face covering, one should be readily available
- Different types of face coverings and masks are available. Face coverings (i.e. neck gaiters, balaclava, surgical, KN95, etc.) and N95 masks are the two most common type used. Both types cover your nose and mouth. Face shields are not an approved face covering, unless approved by HR to accommodate a documented medical condition.
 - Certain face coverings may be reusable and washable. If so, they shall be used for one day then taken home and washed before re-using.
 - N95, surgical, or KN95's shall be used for one day, then discarded.
 - Any person voluntarily using a N95 mask must receive a copy of [Appendix D](#) from OSHA's respiratory standard.
 - Only Flame Resistant (FR) face coverings are to be worn when working in an energized zone or there is potential for a gas ignition. Masks are not FR rated.

- Unless alternative local face covering requirements are posted, the following rules are required and will be enforced:
 - NH/MA/CT – (Unvaccinated) Indoors – Face covering is required to be worn, except when eating or drinking.
 - NH/MA/CT – (Unvaccinated) Outdoors – Face covering is required to be worn when 6 ft. social distancing can't be maintained.
 - NH/MA/CT – (Fully Vaccinated) Indoors/Outdoors – Not required, unless posted. Fully Vaccinated may consider wearing a face covering if they choose, or if they or someone in their household is immunocompromised or at increased risk of severe disease from COVID, or if an adult in their household is not fully vaccinated.
 - If working in a state other than CT, MA, or NH, personnel must follow state and local face covering requirements.
- If an unvaccinated person is unable to wear a face covering or mask due to a medical condition, they must notify their Supervisor and call HRConnect (800-841-8684) to provide supporting medical documentation, and the issue will be reviewed by HR to determine whether an accommodation is possible.

Company Vehicle Safeguards

- Multiple people are allowed in company vehicles. In multiple people per vehicle situations, any unvaccinated are required to wear a face covering.

Training Safeguards

- In-person training spaces will have face coverings, disinfecting spray, hand sanitizer, and paper towels available.
- Indoor training classes shall be limited to no more than 20 persons. In cases where larger groups may need to gather, ECT approval will be required.

Eversource Sponsored Volunteer and Charity Events Safeguards

- In-person volunteerism and social committee events must follow state COVID requirements.

Inside Work Safeguards

- "Inside Work" means all work done **inside** residential homes and/or commercial customer buildings.
- Until further notice, the following changes shall be implemented:
 - All incoming service requests to either the Eversource call center or through Gas Dispatch will require additional screening question(s), as listed in **Attachment A**.
 - For Inside Work that did not come via the Eversource call center or through Gas Dispatch, the screening question(s), **Attachment A**, must be asked prior to entering the residential home or commercial customer building. For customer buildings where asking the screening question isn't practical, Operations must evaluate COVID-19 risks associated with the travel path and worksite to determine if **Attachment B** requirements are needed.

Attachment A – Inside Work Screening Questions

Once you've obtained information on the work that needs to be done, continue the call with the following statement:

"Due to the ongoing COVID-19 pandemic, Eversource is continuing efforts to safeguard our employees and customers. I have to ask you an additional question so we can evaluate whether any additional health and safety precautions are needed."

Continue the call with the following question:

1. Is anyone inside the property confirmed, or suspected of being infected, with COVID-19?

The answer to this question, even if the customer refuses to answer or doesn't know the answer, must be communicated to operations.

Attachment B – Inside Work Employee Safeguards

Before entering the customer's location, the Eversource employee must verify, or ask, the pre-screening question with the customer to confirm the COVID-19 risk and use that information to help make PPE decisions.

Administrative safeguards:

- Maintain at least 6 feet between you and the customer.
- Do not shake hands or engage in any other physical contact with the customer.
- If COVID-19 concern is present, ask the customer to stay in another room and tell you where the equipment is located. Inform them you would like to do this work alone (or with your team), and you will advise them when you are done.
- If COVID-19 concern is present, ask the customer if they would be willing to wear a face covering while you are working inside.

PPE safeguards:

- Normally required clothing, footwear, and safety glasses are required.
- Face shields, disposables gloves and FR coveralls are available but not required.
- Surgical mask is required, regardless of vaccination status, unless the employee decides to voluntarily use a N95 mask. If a voluntary N95 mask is used, the supervisor must provide the employee a copy of [Appendix D](#) from OSHA's Respiratory Protection Standard.
- Masks and some face shields are not FR rated. If the task requires FR rated PPE, then the face covering and face shield, if used, must be FR-rated.

Health Check safeguard:

- Eversource employees who are required to perform Inside Work involving a customer with suspected or confirmed COVID-19 (i.e. they answered "YES", couldn't answer or refused to answer the screening question, or if we were unable to ask the question), will be required to call into HR Connect (800-841-8684) afterwards so the potential exposure can be logged and evaluated.
- If necessary, the employee will be asked to wear a face covering while at work for the next 10 days.
