At Eversource, we appreciate your contribution to renewable energy and welcome you to your new cogeneration billing! Each month the electricity you purchase and the amount of any excess electricity you generate will be displayed on your statement.

Please remember the amount of energy you generate will differ from your sales amount, which refers to the amount of generated energy that is unused and sold back to the electric grid.

Subtotal Delivery Services $62.31
Total Cost of Electricity $101.38
Total Current Charges $101.38

Explanation of your charges
*The Combined Public Benefits Charge represents a combination of three charges formerly known as: Conservation and Load Mgmt Charge, Renewable Energy Investment Charge, and Systems Benefits Charge. This charge also includes the Conservation Adjustment Mechanism approved by the Public Utilities Regulatory Authority in Docket No. 13-11-14.

**Effective January 1, 2007, the Generation Services Charge (GSC) and the Bypassable Federally Mandated Congestion Charge (BFMCC) have been combined into the "GSC Charge" listed in the Supplier Services section of your bill. The GSC reflects all of the cost of procuring energy from Eversource wholesale suppliers. The BFMCC portion of this line item is $0.00060/kWh. If you multiply this BFMCC rate by the number of kWh on your bill, you can calculate the dollar amount associated with the BFMCC.

***Electric System Improvements: Recovers company investments that protect, strengthen or modernize the electric grid.
