

# **New England Participating Transmission Owner (PTO) Procedure for Disclosure of Critical Energy Infrastructure Information (CEII)**

1. This Procedure for Disclosure of CEII (Procedure) has been developed by the New England PTOs and is intended to meet the requirements of FERC Order No. 890. Order No. 890 requires that Transmission Providers establish disclosure procedures for any CEII that is required to be disclosed under provisions of Order No. 890. This Procedure applies to all required disclosures by PTOs of CEII under any of the provisions of Order No. 890, including any required postings on OASIS, and disclosures during stakeholder planning meetings, or otherwise.
2. CEII, as defined by FERC in Section 388.113(c)(1) of the FERC regulations, means information about proposed or existing critical infrastructure that: (1) relates to the production, generation, transportation, transmission, or distribution of energy; (2) could be useful to a person in planning an attack on critical infrastructure; (3) is exempt from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552; and (4) does not simply give the general location of the critical infrastructure. FERC further elaborated in Section 388.113(c)(2) of its regulations that “critical infrastructure” means existing and proposed systems and assets, whether physical or virtual, the incapacity or destruction of which would negatively affect security, economic security, public health or safety, or any combination of those matters. This Procedure will specifically adopt any future modifications to these definitions as approved by FERC.
3. Each PTO will designate a CEII Coordinator, who will be responsible for designating CEII pertaining to that PTO, and who will be responsible for administering this Procedure. All CEII that is intended for disclosure will be clearly identified with the following heading on each page of material: **“Contains Critical Energy Infrastructure Information (CEII)—Subject to New England PTO Procedure for Disclosure of CEII”**. Any person requesting CEII must do so in writing to the CEII Coordinator. Each requester must provide their name, address, telephone number, and the name of any person or entity on whose behalf the CEII is requested, together with a detailed explanation of the particular need for, and intended use of the information. The requester must also include a statement of willingness to adhere to all limitations on use of CEII, as specified in this Procedure.
4. Any access to CEII posted on any PTO OASIS site will be password restricted. Any party desiring access to CEII must make a written request to the appropriate PTO CEII Coordinator, who will provide a password upon the execution of a Non-Disclosure Agreement (NDA) in a form as attached hereto, and upon satisfaction that the disclosure is consistent with FERC policy, FERC regulations, including CEII regulations, and any other applicable law. Attachment 1 hereto is

a form of general NDA, Attachment 2 is a form of organizational NDA, and Attachment 3 is a form of state government agency NDA.

5. For purposes of any public stakeholder meeting in which CEII will need to be disclosed, advance notification of this fact will be provided if possible. In any event, no party will be allowed access to CEII at such meeting until such party makes a written request as specified in this Procedure, executes an NDA and satisfies the designated CEII Coordinator that access to the CEII is consistent with FERC policy and regulations, including CEII regulations, and any other applicable law.
6. For any other instance in which a party requests any information involving CEII from a PTO, the affected PTO CEII Coordinator will provide access to the CEII upon the execution of an NDA, and upon satisfaction that the disclosure is consistent with FERC policy and regulations, including CEII regulations, and any other applicable law.
7. In all instances involving disclosure of CEII, each PTO CEII Coordinator will have full discretion to grant or deny access to CEII to any party, based upon FERC policy and regulations, including CEII regulations, and any other applicable law. Any party denied access to CEII by a PTO may request further guidance, or review of such decision from FERC.
