2022 Transportation Loss Factor

Effective January 1, 2022, the five-year average of gas unaccounted for = 1.1462%. The transportation lost factor = .98853, which is calculated by taking one minus the percentage of gas unaccounted for ($1 - .011462 = 0.98853$) rounded to the fifth decimal place. For billing purposes, the transportation loss percentage/factor changes on a calendar year basis.
