

YANKEE GAS SERVICES COMPANY, DBA EVERSOURCE ENERGY

LONG HAUL SERVICE

RIDER LH
Page 1 of 2

AVAILABILITY: Long Haul Service is a firm service available as an optional service to Operators as outlined in Rate TRS on a pool-specific basis, provided the Company's facilities and gas supply are adequate, in its opinion, to render the required service.

Operators may elect service under this Rider for the purpose of base loading daily deliveries.

MONTHLY RATE:

Pipeline Long Haul Reservation Charge: Equal to the equivalent value of long haul capacity release on each pipeline

Commodity Charge:

For volumes elected on a monthly basis that are nominated for an Operator's pool(s) on AGT, the commodity price of the Rider LH service shall be the first of the month index price for Texas Eastern ELA as published in Inside FERC's Gas Market Report, grossed up for the applicable tariff fuel and commodity charges on both Texas Eastern and AGT.

For volumes elected on a monthly basis that are nominated for an Operator's pool(s) on TGP, the commodity price of the Rider LH service shall be the first of the month index price for Tennessee Gas Pipeline Zone 1, 500 Leg as published in Inside FERC's Gas Market Report, grossed up for the applicable tariff fuel and commodity charges on Tennessee.

ELECTION: The Company will make available during an annual open season in August for service commencing on November 1st, a total available Long Haul Quantity (LHQ) volume. During this open season, Operators may elect a LHQ volume, based on a percentage of its historical peak day load, not to exceed the Company's available LHQ volume, to remain in effect for a 12 month period.

In the event that total elected LHQ exceeds the Company's available quantity, the Company will determine if the additional LHQ can be offered. If not, the Company will ask the Operators to voluntarily reduce their LHQ to coincide with the Company's available LHQ. If the remaining elected LHQ is still too high, the Company will reduce elected quantities on a pro-rata basis or other equitable method to match the Company's available elected LHQ.

In the event that total elected LHQ is less than 8,000 Dth/day, the Company will ask the Operators to voluntarily increase their LHQ to reach the 8,000 Dth/day minimum. If the remaining elected LHQ is still too low, the Company will increase elected quantities on a pro-rata basis or other equitable method to reach 8,000 Dth/day.

An Operator that has subscribed for LHQ may trade that entitlement to another Operator. Both parties must submit to the Company in writing the request for the trade of entitlement. If the written intent of one party does not match the written intent of the second party, the Company will reject the request. Upon the successful completion of any trade of LHQ, the Operator that receives the additional Long Haul entitlements will assume all duties and obligations associated with the Long Haul, including, but not limited to, assumption of the demand charges and assumption of the remaining term of any such obligation.

MINIMUM MONTHLY CHARGE: The minimum monthly charge under this Rider is the Pipeline Long Haul Reservation Charge.
