

June 15, 2023

Dear Neighbor,

As part of our everyday effort to deliver reliable energy to our customers and communities, we are preparing for an upcoming project in the Lakes Region. This project is one of several that are designed to improve the reliability of the electric system serving New Hampshire and surrounding areas where we all work and live.

We're Always Working to Serve You Better

We are preparing to replace transmission structures in Franklin, Tilton, Belmont, and Laconia, N.H. within the power line corridor in your area.

What You Can Expect

This structure replacement project from our Webster Substation in Franklin to our Laconia Substation in Laconia, includes replacing existing wood structures with new steel structures and replacing hardware on select structures. The new structures will be of similar height and placed near the existing structures. When complete, we will remove the old structures from the power line corridor.

We are in the process of identifying any local, state and federal permits necessary in support of this work and will work to obtain those permits.

In the coming weeks, Eversource, through its contractors, will be performing field work within the power line corridor in your area. This work may include soil and other inspections; engineering and environmental surveying; and maintenance of access roads. All people working on this project carry identification.

Construction is expected to begin in Quarter 1, 2024. Please keep in mind that the schedule may change due to weather or other unexpected circumstances.

Health and Safety Is Our Top Priority

Please know that Eversource remains committed to prioritizing public health as well as the health of employees and contractors. All Eversource personnel follow applicable health and safety guidelines to help prevent the spread of COVID-19.

For More Information

Keeping the lines of communication open is important to us. We would like to connect with you to discuss the project, as well as obtain the best contact phone number and e-mail address to reach you moving forward.

Please contact Alex Green at 603-634-2396 or email alexander.green@eversource.com to provide that information or to discuss the project. You can also contact our projects hotline at 1-888-926-5334 or send an email to NHProjectsInfo@eversource.com.

Eversource is committed to being a good neighbor and doing our work with respect for you and your property. We will provide regular project notifications via mailings, phone calls and/or emails. Thank you for your patience as this important project moves forward.

Sincerely,

Alex Green

Eversource
