

January 3, 2022

Dear Neighbor,

As part of our everyday effort to deliver reliable energy, we are rebuilding the Nashua Millyard Substation in your area. Maintaining the infrastructure is one of the many ways Eversource supports the safe and secure transmission and distribution of electricity throughout the region.

Keeping You Informed

Over the last couple of years, we have been keeping you informed about the Nashua Millyard Substation Rebuild Project. This letter serves as an update to that project, to ensure you have the most updated information about the project in your community.

In May of 2021, we notified you that this project was about to begin construction. Shortly after that notification, our contractors began preparing the work areas in an around the new substation location by removing vegetation, performing environmental clean-up, and performing below-grade civil construction activities. Additional work continued into the fall, with foundations for the new equipment being installed, as well as the new substation perimeter fencing.

What You Can Expect

This project is now six months into construction, and at the end of 2021, the new substation is prepared to accept the new electrical equipment. This equipment, including transformers, circuit breakers, and other necessary materials, will be delivered starting in late-February of 2022. Until that time, you will see a lull in construction-related activities, although contracted personnel will still be in the area, performing safety checks, environmental compliance monitoring, snow removal activities, and other periodic visits to the site.

Construction signage has been placed at the construction entrance(s). These signs are to ensure that all members of the public are aware of the construction site, and to provide our contact information as people drive by the area.

The current project completion date is scheduled for Fall of 2022. We will keep you informed of any schedule changes in the coming months. You can also keep informed about the project by visiting the project website, at www.eversource.com/Millyard-Substation-Project.

Our Commitment to Being Available to Our Customers

Keeping the lines of communication open is important to us and we will continue to provide regular project updates via mailings, phone calls, and/or emails. Please contact Sarah Hoodlet at 603-634-2593 or email Sarah.Hoodlet@eversource.com with any questions about this project, or to schedule a time to meet and discuss the project on your property.

Thank you for your patience as this important project moves forward.

Sincerely,

Sarah Hoodlet
Project Services Specialist
