

THE CONNECTICUT LIGHT AND POWER COMPANY, DBA EVERSOURCE ENERGY

SMALL GENERAL ELECTRIC SERVICE ALTERNATIVE

RATE 30A  
Page 1 of 3

Interim Rate 30A establishes a volumetric component (kWh) for Distribution on an interim basis until the Company's next rate case proceeding. This optional rate is designed to benefit small business customers with low load factors.

AVAILABLE for the entire electrical requirements at a single service location measured through one metering installation where the customer's maximum demand is less than 200 kW. Customers with maximum demands that are equal to or greater than 200 kW, but are less than 350 kW, must take service under Rate 27, Rate 27A or Rate 37, and are not eligible to return to Rate 30 or Rate 35 if their maximum demands drop below 200 kW, per DPUC decision in Docket No. 05-10-03. Where the Company deems it impractical to deliver electricity through one service, or where more than one meter has been installed for billing under a withdrawn rate, then the measurement of electricity may be by two or more meters.

Notwithstanding the applicability provisions of other rates, this rate is also available to full-requirements customers that (i) prior to March 1, 1992, had a maximum monthly 30-minute demand in excess of 350 kW; (ii) had a maximum monthly 30-minute demand in the twelve billing periods prior to March 1, 1992, that equaled or exceeded twice the average of the customer's maximum monthly 30-minute demands during the same billing periods; (iii) as of March 1, 1992, had established, and had a reasonable expectation of continuing, a seasonal pattern of electrical usage approximating that established during the twelve billing periods prior to March 1, 1992; and (iv) had not discontinued taking service under this rate or Rate 27 after March 1, 1992. The term of contract for customers eligible to take service under this paragraph shall be one year and shall continue thereafter until canceled by one month's written notice by the customer.

MONTHLY RATE:

DISTRIBUTION SERVICE RATE:

CUSTOMER CHARGE	\$44.00
DEMAND CHARGE OVER 2 KW	\$9.16 per kW
CHARGE PER kWh	\$0.01843

ELECTRIC SYSTEM IMPROVEMENTS:

DEMAND CHARGE OVER 2 KW	\$1.86 per kW
-------------------------	---------------

REVENUE ADJUSTMENT MECHANISM:

CHARGE PER kWh	\$0.00192
----------------	-----------

TRANSMISSION SERVICE RATE:

DEMAND CHARGE OVER 2 KW	\$9.36 per kW
-------------------------	---------------

Rate 30A  
Effective July 1, 2022  
by Motion Ruling No. 6 dated May 10, 2022  
Docket No. 22-01-01

Effective September 1, 2022  
by Motion Ruling No. 21 dated August 26, 2022  
Docket No. 22-01-03

SYSTEMS BENEFITS CHARGE:

CHARGE PER kWh \$0.00053

COMPETITIVE TRANSITION ASSESSMENT:

DEMAND CHARGE OVER 2 kW -\$0.11 per kW

CONSERVATION CHARGE:

CHARGE PER kWh \$0.00000

CONSERVATION ADJUSTMENT MECHANISM:

CHARGE PER kWh \$0.00567

RENEWABLE ENERGY:

CHARGE PER kWh \$0.00100

FMCC DELIVERY CHARGE:  
(as per FMCC tariff)

CHARGE PER kWh \$0.00000

SUPPLIER SERVICE OPTIONS:  
(as per the Generation Services tariff)

GENERATION SERVICE PER kWh \$0.12390  
THIRD-PARTY SERVICE as per contract

FMCC GENERATION CHARGE:  
(as per FMCC tariff – not applicable  
to customers taking THIRD-PARTY  
SERVICE above)

CHARGE PER kWh -\$0.00140

COMBINED PUBLIC BENEFITS CHARGE: Pursuant to Conn. Agencies Regs. § 16-245-1(a)(2)(A) the Systems Benefits Charge, the Conservation Charge, the Conservation Adjustment Mechanism, and the Renewable Energy Charge are combined for billing purposes into the Combined Public Benefits Charge effective January 1, 2014.

RATE ADJUSTMENTS: This rate will be adjusted as provided in the Company's Energy and Transmission Adjustment Clauses.

**COMPETITIVE TRANSITION ASSESSMENT COST ADJUSTMENT:** Competitive Transition Assessment (CTA) charges and terms under this rate includes a CTA Cost Adjustment Charge set in accordance with the Company's CTA Cost Adjustment.

**SYSTEMS BENEFITS COST ADJUSTMENT:** Systems Benefits service charges for all customers taking service under this rate shall be set in accordance with the Company's Systems Benefits Cost Adjustment.

**DETERMINATION OF DEMAND:** The demand shall be the highest average 30-minute kilowatt demand recorded during the billing month, but not less than 2 kilowatts.

**SPECIAL PROVISIONS:**

1. **Primary Metering:** If the service is metered on the primary side of the transformers supplying the customer, 2% of the metered kilowatt-hours will be deducted in computing the bill.
2. **Facilities Ownership:** If the service is taken at the property line and the Company is relieved of owning and maintaining all electrical distribution equipment on private property, except the metering equipment, a credit shall be applied to the bill equal to \$.20 per kW.
3. **Transmission Voltage Delivery Allowance:** Where service is supplied at transmission voltage, 69,000 volts and higher, and the Company is relieved of all investment on the customer's property, except the metering equipment, the Demand Charge under the Distribution Service Rate shall be waived, and all Energy Charges adjusted for the differential between line losses at transmission and primary distribution service. This Energy Charge shall be implemented by multiplying on-peak and off-peak charges by .9735 and .9787 respectively. Service supplied at transmission voltage is unregulated.

**MINIMUM CHARGE:** The minimum charge is the customer charge.

**TERM OF CONTRACT:** None, except as provided above.
