Please note: If your vehicle’s make and model are not on your utility’s list, you can still participate in this program by purchasing and installing a qualifying Level 2 Smart Charger.

Qualifying equipment must match the software and hardware vendors listed above to participate in the EV Charging Program. Qualifying vehicles must match the EV manufacturers listed above to qualify for the Enrollment Incentive. The equipment will differ depending on charger models, software, costs and manufacturer details. Eversource does not offer preferences or recommendations for any of the approved equipment models or EV models. Program participants are responsible for determining the suitability of these products and services.

This Qualified Products List (QPL) is subject to change and sometimes a vehicle or charger model may be added due to new technical integrations with our program partners or removed from the list for a range of reasons including data reliability, or a manufacturer discontinuing a product. In these instances, the Utility will make changes to the QPL.
